(262) 321-9703 • www.linkedin.com/in/lauren-bloxdorf • lauren.bloxdorf@icloud.com

PROFILE

Data professional with a strong foundation in data engineering, analytics engineering, and scalable data architecture. Skilled in SQL and Python for building, transforming, and optimizing data pipelines, with experience in ETL development, data modeling, and supporting BI tools like Power BI. Focused on delivering reliable, high-quality data systems that enable efficient, data-driven decision-making.

EDUCATION

University of Wisconsin-Madison, Wisconsin School of Business, Madison, WI **2026**
Master of Science, Business Analytics Candidate

- Key Coursework: Business Data Technology, Adv SQL & Data Warehousing, ML and AI Models in Business

University of Wisconsin - Madison, Madison, WI **2025**
Bachelor of Science, Certificate in Mathematics, Digital Studies

- Dot Data (2022 – 2025): Attended workshops on real-world analytics tools.
- Women in Business Technology (2023 – 2025): Participated in networking events to grow in tech careers.

PROFESSIONAL EXPERIENCE

Milwaukee Tool, Milwaukee, WI **05/25 – 08/25**
Data Analytics Intern

- Performed NLP analysis on 10,000+ user-generated content to extract sentiment, model topics, and identify key customer themes, leveraging Python to identify customer drivers and influence product feedback.
- Designed and executed ETL processes to integrate and transform marketing data from multiple sources, building a dashboard that visualized marketing funnel investment impact; streamlined reporting workflows and eliminating 5 hours of manual reporting work per cycle compared to previous methods.
- Led weekly stakeholder meetings to provide project updates, address roadblocks, and respond to questions, ensuring alignment and timely decision-making.

CNH Industrial, Racine, WI **05/24 - 08/24**
Business Intelligence and Data Science Intern

- Implemented SQL and Python in Databricks to analyze large-scale structured and unstructured datasets, leveraging NLP to achieve text-based insights.
- Designed 2 interactive Power BI dashboards to enable real-time insights for cross-functional teams.
- Automated manual reporting workflows, improving team efficiency, and provided strategic insights to senior leadership that guided operational improvements and resource allocation.

Consumers Credit Union, Gurnee, IL **05/23 - 08/23**
Business Intelligence Intern

- Conducted in-depth analysis using SQL, Excel, and Domo to increase efficiency of departmental analytics and decision-making.
- Created dashboards and visual reports to communicate performance trends and recommendations to executives.
- Presented performance insights and recommendations to managers daily, enhancing cross-team communication and alignment.

SKILLS

Software and Tools: SQL, Python, R, AWS, Power BI, Tableau, Databricks, Google BigQuery, MySQL Workbench, Snowflake, dbt

Certificates: Microsoft Certified Application Specialist: Using Microsoft Office Excel 2016 (2021)

PROJECTS

Marketing Funnel Dashboard (Power BI, SQL): Designed and built a dynamic Power BI dashboard by performing ETL processes on marketing data to visualize the funnel and demonstrate the impact of marketing investments, enabling stakeholders to assess campaign effectiveness and optimize strategy.

Text Mining for Warranty Claims Reduction (Python, SQL): Applied NLP techniques in Python and SQL to analyze claim descriptions, reducing warranty-related tickets 10% through insights to improve claim accuracy and process efficiency.

Dashboard for Audit Claim Selection (Power BI): Automated audit selection by developing custom flags and DAX measures in Power BI, saving manual hours and streamlining audit workflows.
